

Theoretical Principles Of Development Of Geographical And Ecological Culture Of General Education School Students

Komilov Jamshidbek, Son Of Narimon

*Tashkent State In The Name Of Nizomi Pedagogical University,
Basics Of Geography And Economic Knowledge 5th Year Student*

Abstract. *This Article Discusses The Conflicting Relationship Between Humanity And Nature, And The Work Being Done To Change This Relationship In A Positive Direction. Also, The Current Aspects Of The Problem Of Development Of Geographical And Ecological Culture Among Secondary School Students Are Highlighted.*

Key Words: *Geo-Ecological Culture, Environmental Problems, Natural Environment, Protection, Environmental Education And Upbringing, Social Laws, Relations Between Society And Nature.*

Realizing That Humanity Is A Part Of Nature Since Ancient Times, It Has Felt That The Relationship Between Its Actions And Nature Is Consciously Controlled. But Humanity Realized That It Is Necessary To Use Nature To Restore It, Although It Was Too Late. As Human Culture Develops, The Process Of Culturalizing And Using Some Of The Natural Gifts Of Flora And Fauna For Themselves Is An Ongoing Process.

Environmental Purity, Preservation Of Its Diversity And Diversity, Development Of Ecological Culture And Its Management Mainly Depend Not Only On The Activities Of The State Committee For Nature Protection And Its Local Organizations, But Also On The Duty Of Local State Authorities. Certain Laxities Are Allowed In The Implementation Of Laws And Decisions Of Our Government On Environmental Protection. The Reason Is That The Maintenance Of The Trees Planted In Certain Years For Agricultural Use, Restoration By Replanting Instead Of Their Dried Species Is Not Satisfactory. Because Some Farmers Continue To Cut Down Tree Plantations Without Realizing The Necessity Of The Plantations Established In Order To Increase The Yield Of Products.

To Further Improve The Currently Used Economic Mechanisms In The Protection Of The Environment And The Rational Use Of Natural Resources, To Apply A Nature Tax To Those Who Misuse Nature, And To Develop Effective Mechanisms Of Geocological Education In The Development Of The Formation Of The Geocological Culture Of Society. Need With This, There Is An Opportunity To Regulate Production And Human's Attitude To Nature In Our Republic.

Geocological Knowledge Is The Structure, Development, Change Of Living Nature, The Condition Of Living Creatures On The Earth, Their Relationships With Each Other And The Environment, The Quantity And Quality Of Natural Resources, Their Size And Quality, And Their Preservation. And Mastering The Ways Of Economical Use.

The Basic Meaning Of Geocological Education And Training Is To Study And Implement The Permanent Unity Between Nature And Society And The Natural And Social Laws That Connect Them To Each Other.

Geo-Ecological Education And Training Is To Teach A Person To Consciously Use Nature Throughout His Life, From The Moment He Steps Into Nature, To Educate The Customs And Traditions Of Our People That Treat Nature With Respect And Attention From The Psychological And Moral Point Of View, To Preserve Natural Resources. It Consists In Encouraging The Establishment Of Breeding, Gardens, Flower Beds, And Awakening Good Feelings In His Heart.

The Goal Of Environmental Education Is To Raise A Knowledgeable Person Who Knows The Natural Environment Surrounding A Person And Its Resources, Uses It Sparingly, Preserves It, Adds Beauty To The Wealth And Beauty Of Nature, And Knows Social And Natural Laws. People Who Treat Nature With Respect And Attention, Notice And Observe The Positive And Negative Changes Happening In Every Corner Of It, Go To Help Nature, I.E. Restore A Fallen Bush, Fix A Sick Animal, Treat It, Try To Clean Dirty Water. Does, Puts Out The Fire, Etc.

Nowadays, In A Time When The Relationship Between Society And Nature Is Becoming Tense, Along With The Development Of Various Sectors Of The Economy, It Is Time To Educate Young People With Deep Knowledge About Environmental Protection And Economical Use Of Natural Resources. In The Following Years, They Were Treated Cruelly. They Choked Natural Rivers, Blocked Their Paths, Created Artificial Seas, And Cultivated Deserts. Due To These "Achievements" The Laws Of Nature And Its Complex And Delicate Balance Were Broken. Human Qualities Such As Spiritual And Moral Purity, Faith, Honesty, Religion, Honor, Kindness, Respect For The Elderly, Which Play An Important Role In The Spirituality Of The Society And The Development Of The Individual, Are Not Formed By Themselves.

The Basis Of All Of Them Lies In The Content, Ideological Direction And Effect Of The Education And Upbringing Carried Out In The Family And The Educational System For The Young Generation. In This Regard, One Of The Main Components Of The Formation Of A Well-Rounded Human Personality Is The Development Of Students' Geo-Ecological Consciousness And Culture. A New Approach To The Organization Of The Important Components Of Social Education - Mental, Spiritual-Ethical, Physical, Labor, Aesthetic, Legal, Ecological, Economic Education In Order For The Growing Young Generation To

Become A Complete Person In Accordance With The Requirements Of The Times. , The Development Of Their Effective Ways Is Of Special Importance. These Are The Most Important Tasks In Education.

Instructions On Respecting Nature And Protecting The Environment Have Been A Source Of Inspiration As A Centuries-Old Spiritual Heritage From Our Ancestors. Love For Nature Is Instilled In A Person's Heart From The Moment He Was Born, From Infancy. A Person Who Has A Strong Love For Nature Will Also Have A High Love For Elulus And The Motherland.

There Is A Lot Of Wisdom In Education, Especially In Eastern, Uzbek Education About Respecting Nature. For This, First Of All, We Need To Educate Elementary School-Age Students As Ecologically-Spiritual Young People.

Geocological Education Forms In Students A Loving Relationship With The Environment, The Universe And Man, Animal And Plant World. After Independence, Great Attention Was Paid To The Ecological Situation And Environmental Education In Our Country. Until Then, Ecological Problems In Uzbekistan Were Not Taken Into Account. Because Of This, The Ecological Situation In Our Country Is Causing A Number Of Problems. In Order To Solve These Problems, Environmental Education Has Become One Of The Main Directions Of The Educational System.

Now It Has Become Clear That Neglecting The Environment And Natural Resources Can Cause Serious Damage To The Entire Planet. There Was A Need To Solve The Problems Of Relations Between Man And Nature. At The Same Time, Improving The Ecological Situation Has Become One Of The Main Tasks.

Formation Of Geo-Ecological Culture In Students Has Become An Urgent Issue Of Education System, Teaching Them How To Interact With Nature And Environment. It Is The Need Of The Hour For A Mature Person Of The New Century To Be Able To Demonstrate The Elements Of Ecological Education. Ecological Culture - In-Depth Knowledge Of The Environment, Having A Sense Of Nature Protection, Caring For Plants And Animals, Rational Use Of Natural Resources, Concern For Their Reproduction Is A High Indicator Of Practical Activity Aimed At Hitting.

A Person Who Can Reflect These Qualities Can Be Called The Owner Of Ecological Education. Don't Waste Excess Water, Don't Pollute Water Bodies, Don't Dump Waste Where You Come Across, Keep Your Residences Tidy, Don't Break Plants And Flowers And Plant Them, Take Care Of Animals, Take Care Of Birds, Turn Houses And Alleys Into Flower Beds. Actions Such As Turning Are The Simplest Manifestations Of Ecological Civilization.

Ecological Education And Upbringing - Conscious Use Of Nature From The Moment A Person Steps Into Nature, Throughout His Life, Raising Young Generations To Respect And

Pay Attention To Nature, To Raise The Feeling Of Increasing Natural Resources, Gardens, Flower Gardens Encouraging To Organize Consists In Awakening Good Qualities In Human Heart.

Ecological Education Is Aimed At Instilling Love For Nature And The Environment In A Person, Formation Of Thriftiness, And The Fact That Nature Protection Is One Of The Main Issues Of The Present Time, It Is A Priority Aspect In Educating Students. In The Process Of Ecological Education, Young People Are Taught To Conserve Natural Resources And Protect Nature.

The Main Goal Of Ecological Education Is To Increase People's Ecological Literacy And Culture, To Protect Nature With The Efforts Of Ecologically Cultured, Educated People, To Keep It Neat And Clean, To Care For Nature By Instilling Love For Animals, Birds, And Plants. Consists Of Today, Great Attention Is Being Paid To The Issues Of Ecology And Environmental Education.

In Order To Provide Ecological Education, A Number Of Topics Are Included In The Textbooks, Which Will Certainly Help To Increase The Knowledge And Education Of Students. During Extracurricular Time, Students Are Taken To The Heart Of Nature, To Nature Museums, And In The Process Of Saturdays, Conversations, Mornings, Environmental Education Is Formed. In The Course Of The Lesson, Students Receive Environmental Education Through The Teacher's Story And Topics Expressed In Textbooks.
